St. Albert W.I. Extends Invitation

ST. ALBERT — The St. Albert Women's Institute extends to all ladies a hearty invitation to come to their first meeting of the new year, Jan. 25, at 8:15 p.m. in the community hall.

The main theme of the evening will be a talk on Agriculture and Canadian Industries by Mrs. Ted Atkinson. They can assure you this will be very interesting and timely. Do not miss it.

For their roll call members will tell the name of their favorite book or magazine.

A social time and refreshments will follow the meeting.

ST. ALBERT BRIEFS

ST. ALBERT — Mr. J. J. Bourgeois returned home last Saturday after spending a few days in the hospital for a check-up.

We are pleased to see Mrs. A. Labelle back home again from the hospital. You don't have to worry about the housework, Mrs. Labelle. Mr. Labelle and Paul are very good with the dust mop.

Two weeks ago there appeared in the St. Albert Gazette an article about six innocent little souls from Villeneuve, who left home to attend a party in St. Albert, but when they arrived at their destination the host was in bed. The host can only believe that these "poor souls" made a big ballyhoo to revive a little sympathy, but it did not work. From the hour at which they arrived one would believe they had been invited to breakfast and not to an evening of entertainment. In any case, next time they should know enough to come before 11:30 p.m.

Some people are wondering when the skating rink will be ready. Someone said in the month of March.

Mr. and Mrs. N. M. Ross motored to Banff for the week-end to visit their daughter Sheila.

Mrs. R. Lafrenchie spent the week-end visiting relatives in North Edmonton.

The C.Y.O. of St. Joseph cathedral entertained many of the out-of-town groups. St. Albert had 35 members attending this reunion last Sunday, Jan. 16. The day's activities were mass at 10:00 a.m., skating in the afternoon, a meeting and social in the evening.

TRY A CLASSIFIED AD. IT PAYS!

News From Imperial Oil

MORINVILLE — A "Safety-Dinner" sponsored by Imperial Oil Limited and celebrating six months of successful work at the Mearns National No. 2 well with no accidents was held in the Blue Bird Cafe, Wednesday, Jan. 12.

Some 50 guests attended, including Mr. Ernest Starr of Calgary, the Imperial Oil representative. Those present were members of the crew from the Mearns well and their escorts.

Following the banquet, a dance, open to the public, was held in the community hall.

The Mearns National No. 2 rig has been moved near Ellerslie, and is now known as the White Mud No. 1 well. The rig from Vimy has been taken 2 miles north and 2 miles east of Bon Accord.

JASPER BEAVER TO BRITAIN

En route to England as part of Canada's donation toward the replenishment of bombed out zoos, these beaver took along their own supply of hardtack. Natives of Jasper National Park, they will feed on tasty, vitamin packed Poplar poles cut for them by the Park's warden, George Fowle, who is shown serving them their last meal before the journey eastward. With three bears for travel mates, the beaver left Jasper in a Canadian National Railways express car and were transferred to an ocean liner on arrival at Montreal.

Justin Douziech Passes Away

On January 12, 1949, Justin Marcellin Douziech of 10927 97 St. passed away in the city at the age of 66 years. Born in Averon, France, in 1883, he came to Canada in 1907 and for the next two years was employed by Mr. Louis Como of Villeneuve. Then after working for some two years for Mr. Jim Como, Mr. Douziech bought his farm at Mearns. In 1938 he and Mrs. Douziech spent two months in France visiting relations and old acquaintances.

The farm was sold in June, 1948 and Mr. Douziech, suffering from a stroke, remained in hospital from July until the time of his death. Before passing away, he saw his family all well established and his greatest wish to see one of his sons become a priest was granted in May, 1946, when his son Edmond was ordained.

He leaves to mourn his loss his loving wife, six sons and four daughters. Napoleon of Morinville, Victor of Legal, Roland of St. Albert, Rev. Edmond Douziech of St. John's College, Edmonton, Leo of Morinville, Louis at home, Mrs. R. Sevigny of Edmonton, Mrs. E. Meloche of St. Albert, and Theresa and Cecile at home. He also leaves two brothers and two sisters in France, sixteen grandchildren survive.

Funeral services were held on Saturday morning from the residence to St. Albert where services were held at 11:00. Rev. Edmond Douziech officiated and interment was made in the family plot in the church cemetery.

BABY BRUSH-OFF

A child's milk teeth or "baby teeth" are very important. If they are improperly cared for, the permanent teeth may come in crooked and uneven. Make sure your youngster cleans his teeth regularly.

Legumes, Grass In Rotation

(Experimental Farms News)
The beneficial effects from legumes and grasses included in crop sequences is becoming more evident. Where these important crops are given consideration, the resulting effect is shown in the more effective control of weeds and the replacing of soil fertility. The physical condition of the soil is generally improved, permitting a greater water-holding capacity and higher returns per acre.

Not only is alfalfa an important crop in soil improvement but it provides, without doubt, the most economical source of protein readily accessible to the prairie farmer. Well-cured alfalfa hay is a cheap source of high protein and minerals, and establishes a basis for an economical rotation, especially for dairy cattle and young stock.

Studies made at the Experimental Station, Morden, Man., says W. J. Breakley, show that increases in subsequent crops following alfalfa may be expected when the legume is left down for only two years.

Yields of wheat following alfalfa as compared with wheat after sweet clover, summerfallow, corn and grass, over a seven-year period, are as follows:

	Bus. per acre
Wheat after Alfalfa	41.4
"Wheat after Sweet Clover	37.5
Wheat after Summerfallow	34.7
Wheat after Corn	35.3
Wheat after Grass	29.8
Sweet Clover being a biennial, can be used to good advantage as a legume on soil where there is danger from wind erosion.	35.0
Wheat after Sweet Clover	35.0

In dry years sweet clover has proved equally as beneficial for subsequent crops as has alfalfa. This is especially true for the lighter soil types. Alfalfa tends sometimes to kill out after three years in the lighter soil areas. Sweet Clover being a biennial, can be used to good advantage as a legume on soil where there is danger from wind erosion.

Higher yields of alfalfa may be expected from the first and second year cuttings than from subsequent years.

In summarizing the Morden data over a seven-year period, yields of alfalfa have averaged 3.26 tons of hay per acre from alfalfa down year and 3.70 tons on second year cuttings. The average yield for a five-year period was 2.65 tons per acre.

Local Boxing Program

MORINVILLE — Morinville fight fans will be happy to hear that rather than having to travel all the way to Edmonton to see a boxing match, the boxers will reverse the situation and travel to Morinville on Friday, Jan. 28.

From George Bougie, the local baker's son and the promoter of the said boxing show, comes word that he has made arrangements to stage a high class boxing program, made up mostly of some of the best material available in Western Canada and of course that includes a Morinville youth, none other than Charlie Schaeffers who has been doing very well in the professional boxing field.

Bougie explains that the support which the Morinville people have been giving the Edmonton shows, indicates that the people are great sport fans and like the boxing game. So with these thoughts in mind he has decided to promote right in Morinville, where the bulk of fight fans seem to reside. Of course the fact that Charlie Schaeffers is a local product and doing so well had a lot to do with his decision.

So on Friday, Jan. 28 at 8:30 p.m. in the parish hall, we will all be able to see our hero perform against our opponent Billy Smith, who is the only man that has ever defeated Charlie and there is no doubt in our minds that Charlie will avenge his defeat and what better place could there be than right at home. In any case the town people certainly wish him the very best of luck and may he bring home the bacon.

Our neighbors to the north are also trying to steal some glory from another local. Louis Demers of Legal has challenged our Bill Bennett to a match and those two will also appear on the same card. Another well known boxer, Johnny Kos who fought the main event on the last boxing show that Morinville witnessed, will also be on hand and although a suitable opponent has yet to be announced, Bougie informs us that he will be boxing for sure and in fact we quote him as saying, "Johnny Kos will be fighting here on the 28th but it's hard to get an opponent for him. However, he'll be fighting for certain even if I have to fight him myself."

There you have it fight fans, and from all indications you should be in for quite an evening because there is no doubt that the card is packed with real boxing talent and it should provide you with what you all like to see, Morinville is growing up and can stand such forms of entertainment, so let's support it.

MORINVILLE NEWS

MORINVILLE — Mrs. Omer Houle is visiting her daughter and son-in-law, Mr. and Mrs. Joseph Dupuis of Edmonton, Mr. and Mrs. Dupuis are the proud parents of a baby girl, born Jan. 6 in the Royal Alexandra hospital.

The new assistant at the post office is Mr. Lionel Le Rose of Legal.

Mrs. Joseph Tellier and Mrs. Alfred Martel are in hospital.

Robert Cummings, starring in the Hal Roose production "The Accused," is a home movie fan and spends as much time behind a camera as he does before one.

LEGAL NEWS

LEGAL — Mrs. George Leduc had an operation a few days ago. She is reported to be coming along fine.

Mr. Sam De Champlain passed away at the Westlock hospital last Monday night. He was buried last Wednesday.

Mr. Ferdinand Martineau has been appointed school trustee. He replaces Mr. Leo Carrier.

Mr. R. W. Graves is back from the hospital and is feeling fine.

Janet Kaene, Jacqueline Giguire and Cecile Lessard are the candidates for the carnival to be held at the end of February.

Mrs. Dominique Coulombe spent the week-end with her parents at the old people's home at St. Albert.

Mr. and Mrs. Roland Cyr went to Slave Lake to visit Renee Cyr's over the week-end.

Last Wednesday the ladies had a meeting at Mrs. George Montpetit's. This week the meeting is to be held at Mrs. A. Hebert's.

Mr. Victor Douziech's father died last week. The funeral took place last Saturday.

VILLENEUVE NEWS

VILLENEUVE — The C.Y.O. meeting was postponed until a later date because the young people of this parish were guests of the St. Joseph Cathedral C.Y.O. Plans were made there to obtain a better outlook towards this organization. A representative was elected to join in the central executive, that is, Walter Borle is to be the local representative at the meetings held in Edmonton.

An enjoyable day was had by all and the members here wish to take this opportunity to thank the Cathedral C.Y.O. for their thoughtfulness towards the small-town groups.

Mr. and Mrs. Andre Boele are the proud parents of a baby girl born at the General Hospital on Jan. 2. Congratulations and the best of luck to the first Villeneuve baby of 1949.

There seems to be a bad hill on one of the side roads. That's what Mr. Alex Guimet and party found out last Sunday night when he had an accident there. His car turned upside down but luckily nobody, no body was hurt.

Mrs. Claire Kremer broke her right arm lately and her sister came to help during the holiday season.

Annual Meeting Municipal District

MORINVILLE — Mr. Patry, secretary of the Morinville Municipal District has announced that the regular annual meeting will be held on the third Saturday of February. This will be on Feb. 19 and the meeting will be in the parish hall.

During the past year Mr. J. G. Dusseault of Vimy has been reeve of the municipality. His colleagues on the council are J. Schaeffers of Morinville, N. C. Perrott, R.R.L. Morinville, A. Salgo of Villeneuve, and G. Meunier, also of Morinville.

Sterling Hayden top flight sailor of Hollywood's film colony and one of the stars of Pine-Thomas "El Paso" Paramount color release is considering an offer from a publisher to write a story of his two round the world sailing voyages.

A Job Well Done

Two boys, Doriste and Montcalm Desroches, aged 15 and 17 of Lafontaine, Ont., have been awarded a Certificate of Merit for outstanding achievement in Boys' and Girls' Club Work 1945-48. From one bag of potatoes given to them in 1945, they multiplied them to a total of nine acres which successfully passed as Foundation A seed in 1948.

The award was given because these two boys achieved in four years what has taken many other growers a life time to accomplish.

Penicillin Spoils Quality of Cheese

Farmers whose cattle are being treated with penicillin for mastitis should not send their milk to cheese factories until one day after end of treatment. This warning comes from the Dominion Department of Agriculture's Science Service, which points out that milk containing even small amounts of penicillin is no good for cheese making.

Among the many bacteria killed by penicillin are the lactic acid bacteria which convert milk to cheese. By interfering with normal acid production by mixed or single strain starter organisms, penicillin not only prolongs the time of cheese manufacture but lowers the quality of cheese.

Science Service's Division of Bacteriology and Dairy Research has found that even one part of

penicillin in 330,000,000 will have this disastrous effect.

Until cheesemakers neutralize penicillin in cheese milk by adding a minute amount of penicillinase, milk from cows under treatment for mastitis should not be shipped to the factory.

ON THURSDAY!

HARRIET HILL, woman's page editor of The Gazette in Montreal and well-known as a radio commentator, will be the next speaker in Deeds That Live, a series saluting women who helped accomplish great social or economic reforms down through the ages. On Thursday, January 13th, at 4:03 p.m. on CBW; 2:48 p.m. on CBK and CBX. Harriet Hill told about Catherine of Russia.

D. H. E. NOTES

By C. RUTH MURRAY,
Westlock, Alta.

Undue fatigue, restlessness, stunted growth, deformed bodies, irritability, sore eyes, and many other conditions, may result from continued and repeated low intake of certain nutrients. This usually results from habits of eating which do not systematically supply these nutrients. Unfortunately adult man does not have an instinct to guide him to adequate nutrition, and food habits often develop even among primitive people, that exterminated whole tribes. Help is needed if people are to be well fed. In Canada malnutrition results from ignorance and indifference rather than lack of enough food and finances.

Nurses, teachers and home economists have the great task of encouraging and explaining good food habits. For the next few weeks we will devote this column to suggestions for economical and practical ways of following Canada's food rules.

CANADA'S FOOD RULES

These are the foods for health. Eat them every day and drink plenty of water.

- 1—Milk: Adults, $\frac{1}{2}$ to 1 pint. Children, $\frac{1}{4}$ to 1 quart.
- 2—Fruit: One serving of citrus fruit or tomatoes, or their juices or one serving of other juices.
- 3—Vegetables: At least one serving of potatoes and at least two servings of other vegetables. Preferably leafy, green or yellow and frequently raw.
- 4—Cereals and Bread: One serving of whole grain cereal and at least four slices of Canada approved Vitamin B bread (whole wheat, or white with butter).
- 5—Meat and Fish: One serving of meat, fish, poultry or meat alternates, such as beans, peas, nuts, eggs or cheese. Use eggs and cheese at least three times a week each. Use liver frequently.

A fish liver oil, as a source of Vitamin D, should be given to children and expectant women, and may be advisable for other adults. Iodized salt is recommended. This is a daily guide to healthful eating.

National Grain Tests New Weed Killing Chemicals in Texas

Two years ago National Grain agriculturists went to California and took advantage of winter growing conditions there to prove the value of low-water-volume, 2,4-D spraying in time to make this method usable during the summer of 1947.

Representatives of the National Grain Agricultural Department are now conducting further extensive winter experiments near Kennedy, Texas, to test out three different 2,4-D chemical formulations in order to make the results available for use by Canadian farmers next summer.

Tests will be made on flax varieties similar to those grown in this area, and also on small grains.

They will be conducted with the co-operation of representatives of the United States Department of Agriculture.

All Texas experiments will represent a continuation of several hundred similar experiments conducted by the National Grain during the past five years.

Fur Show Held in Edmonton Recently

The Eleventh Annual Felt Show sponsored by the Alberta Fur Breeders' Association was held in Edmonton on January 10th to 12th, and in conjunction therewith there was staged a monster fashion show on the afternoon and evening of

January 12th, the first of its kind ever held in Alberta.

This province is renowned throughout the fur industry as producing very high-class ranch raised furs and is the third largest producer of these furs in Canada. There are more than 1,800 registered fur breeders in Alberta. Fur ranches are found all over the country with several in our own district.

The association proclaimed the week of January 10th to 15th as Alberta Ranch Fur Week and merchants throughout Alberta were invited to participate in the event by displaying in their show windows fur garments as well as raw fox and mink furs provided for the purpose by fur ranches in the neighbourhood to assist in making Alberta Ranch Fur Week a memorable event.

Over \$56 Million Bet at Race Tracks In Canada in 1948

During the 349 days horse racing in Canada at 34 meetings in 1948, a total of \$56,178,491 was wagered, an increase of \$7,658,582 over the amount wagered at 329 days racing at 36 meetings in 1947. Prize money in 1948 totalled \$2,755,400, an increase of \$431,725 over 1947.

Of the total of \$56,178,491 wagered in 1948 Ontario accounted for \$37,368,215 with 144 days racing. British Columbia was second with \$7,213,980 wagered during 70 days racing; Manitoba was third with \$4,216,707 wagered at 28 days racing; Alberta fourth with \$3,447,711 at 39 days racing; Quebec fifth with \$3,157,975 and 56 days racing; Saskatchewan, sixth with \$773,903 wagered during 12 days racing.

There is no pari-mutuel betting at race tracks in the Maritime provinces under the supervision of the Dominion Department of Agriculture.

The statistics for cities show that Toronto was the leader in the amount wagered by a big margin with \$26,288,059. Vancouver was second with \$6,225,283; Port Erie third, with \$4,813,369, followed by Winnipeg, \$4,216,707; Hamilton, \$3,974,369; Montreal, \$2,579,013; Niagara Falls, \$2,290,418; Edmonton, \$1,994,172; Calgary \$1,453,539; Victoria, \$988,697; Ottawa, \$578,962; Regina, \$421,977; and Saskatoon with \$351,926.

The largest amount wagered at any one meet, was at the fall seven-day meeting of the Ontario Jockey Club, Woodbine Park, Toronto, Ont., when \$2,280,007 was wagered.

All betting at race meetings in Canada for what is known as running horses, must be under the pari-mutuel system. It is carried out under the supervision of J. D. Higginson, Supervisor of race track betting for the Dominion Department of Agriculture. Taxes deducted by the provinces range from five to ten per cent and each racing association is allowed a percentage ranging from nine down to five per cent according to the total amount wagered.

Cameron Promoted To Dairy Post

Announcement was made recently by the Dominion Department of Agriculture of the promotion of William C. Cameron to Chief of the Dairy Products Division and Assistant Director, Marketing Service. Mr. Cameron was previously, Chief, Dairy Products Inspection and Grading Services at Ottawa. He will succeed Mr. J. F. Singleton who retired on superannuation.

William C. Cameron is a graduate of the University of British Columbia, Vancouver, B.C., where he majored in general dairying with special attention to the manufacture of dairy products.

He first joined the Dominion Department of Agriculture in the spring of 1927, when he was appointed Dairy Produce Grader and had charge of the Dairy and Cold Storage Branch office at Calgary, Alta.

In 1929 he left government service to spend five years in private business and in 1934 left that to work for a year at the University of Alberta, Edmonton, as creamery instructor. At the same time, he served as Chief Creamery Instructor for the Province of Alberta.

He rejoined the Dominion Department of Agriculture in September, 1935, and has been with the department ever since, filling the positions of Chief Inspector of Dairy Products, Associate Chief, and then Chief, Dairy Products, Inspection and Grading Services.

Mr. Cameron is a member of the Professional Institute of Civil Service of Canada and has been Canadian representative on the ice-cream section of the International Association of Milk Sanitarians.

Cattle Should Be Watched for Lice

At this time of year when cattle and young stock are established in winter quarters, a careful watch should be made of all animals for signs of lice. Cows and heifers will sometimes come in in the late fall and winter infested with lice, even though the buildings have been thoroughly cleaned during the summer months. Young calves housed during the summer should also be watched. By careful examination, the appearance of lice can be detected on the head and neck of the animal or on the tail-head and hind quarters.

Cattle that are allowed to become thoroughly infested with lice will exhibit a dry stare coat, loss of hair resulting in exposed patches of skin and a general unthrifty appearance. Such a condition results in lowered milk production, retarded growth and more costly maintenance. Early detection of lice and prompt treatment will prevent any ill effects to infested animals.

Numerous sprays, dips and powders or the judicious application of oils have been used to eradicate lice on cattle. In recent years DDT in the form of a spray or powder has proved highly effective.

The practice adopted at the Central Experimental Farm, Ottawa, says V. S. Logan, is to apply five per cent DDT powder using a shaker or open container. The affected animals are thoroughly covered and the powder is rubbed well into the hair. A second and sometimes a third application is made at 10 to 12 day intervals to insure the destruction of any lice that may have hatched after the initial treatment. In summer, with spray for flies both on the animals the regular application of DDT and about the stable, the application of powder is rarely required except possibly on calves that remain housed during the summer months.

dicating lice on cattle. In recent years DDT in the form of a spray or powder has proved highly effective.

FOR SALE—New and second hand Furniture, used Stoves and Washers, Strathcona Furniture Exchange, 8222 103 St., Edmonton. C 17

FOR SALE—New and used CCM Bicycles; also Soft Balls and Bats. United Cycle & Motor Company, 10342 82 Ave., Edmonton. C 17

FOR SALE—100-lb. stoker, used 60 days; 2-battery radios; 1 combination record player. Apply S. Martineau, Hughenden, Alta. T 1

FOR SALE—Pure bred Hereford bull, Dominion Lad-403-3-12-193691. Dark color. Four milke cows, 2 to freshen Jan. 20, and 2 in Feb. Phone 413, Art Link, 1 mile south of Forestburg. J15-22

FOR SALE—100-ft. John Deere Tiller. Worked only 450 acres of land, in A1 shape, with alloyed blades, wheel weights; depth control; on rubber. Price \$500. Also Massey-Harris Pacemaker Tractor, twin power, in A-1 shape. Price \$1000. Lucien Provost, Legal, Alta. C J-14-21

FOR SALE—60-ft. John Deere Tiller. Worked only 450 acres of land, in A1 shape, with alloyed blades, wheel weights, depth control, on rubber. Price \$500. Massey-Harris pacer-mower tractor, twin power, in A1 shape. Price \$1000. Lucien Provost, Ph. 7, Legal. C J-15-22

FOR SALE—Set of new sleighs, cast; set of heavy breeding harnesses; low wooden John Deere wagon; coal heater. Phone 22, Wes Hall. P J19

FOR SALE—General Store, stock approximately \$7,000. Buildings, 2 warehouses, 5 room new place house and exc'd side lines. Government telephone. Worth investigating. Stanley Grandish, Hvyo, Alta. P J23-25

FOR SALE—1946 W-9 I.H.C. Standard Tractor with lights, starter and P.T.O. On new 14x34" tires. For quick sale, \$3100. Apply Deswald Brothers, Cactus Lake, Sask., or phone (Denzil) 9F21. C J-21-28

FOR SALE—14" four-furrow Cockshutt plow. New shears. Apply W. G. Cotton, Killam, Alta. P J-17-24

FOR SALE—One No. 35 6 ft. Cockshutt tiller, seeder attached, extension rim, A1 condition. Price \$350. Also 9-piece oak dining room suite, complete. Price \$100. Arnold Marlow, H.R. 1, Loughhead, Alta. P J23-29

FOR SALE—1945 Model G.M.C. 1½-ton truck. New tires. Fully winterized. Paint and body like new. See Paul H. Long, Lac la Biche. C J23-29

FOR SALE—Tractors on steel, one John Deere Model D, one 15-30 I.H.C. with 22-36 sleeves and pistons. Both reconditioned and ready for work. Price each only \$800. Apply A. Plachner or Mrs. Mike Holowiecki, Boyle, Alta. C J22-29-F5

FOR SALE—1932 Model B Ford coach. Good condition. What offers? John A. Penna, Phone R305, Czar. C J22-29-F5

FOR SALE—Good slough hay, 5 or 6 tons. John Vass, Hughenden, P J22

FOR SALE—While they last, two only, Connor Thermo Tub Gas Engine Washing Machine, Price \$248.50, freight prepaid. Phone or write Holmberg Bros., Phone 1, Hughenden, Alta. C J22-27

MEN'S PURE WOOL SOCKS

Very warm, extra long wearing, grey or white. Medium weight, \$1.15 pr. or \$12.00 doz. prs. Light weight 95c or \$9.60 doz. prs. Men's wool mitts 90c pr. Delivered. Mary Maxim, Sifton, Manitoba.

- LOST -

LOST—Truck end-gates (new) between Vimy and Westlock. Finder please phone Barhead 46 or 49, or write C. J. Johnson, Barhead Sales & Service, Barhead, Alberta. Reward offered. C J-15-22-29-F-5

- WANTED -

ALL YOUR OLD SHOES (to be rebuilt into handsome, comfortable footwear to give you miles of carefree walking service. Send them to CORONA SHOE REPAIR, 10756 Jasper Ave., Edmonton. C Jy10-17

WANTED—We have 150 acres to break early in the spring. Caterpillar preferred. Parties interested write and state terms. E. W. Meyer & Sons, Caslan, Alta. P J15-22

PERSONAL

ADDING MACHINE WONDER—Adds, subtracts, multiplies, divides, saves time, saves costly mistakes, only \$19.95. Free literature on request. Dept. B, Factory Distributors, 1590 Niagara Street, Windsor, Ont. P J15-22-29

THE NIGHT AFTER CHRISTMAS

'Twas the night after Christmas, and boy, what a house!

I felt like the devil, and so did the spouse;

The egg-nog and turkey and candy were swell,

But two hours later they sure gave me hell.

The stockings weren't hung by the chimney with care,

The darned things were sprawled on the back of a chair.

The children were nestled all snug in their bed,

But I had a large cake of ice on my head.

And, when at last, I dozed off in a nap

The ice woke me up when it fell in my hair.

Then for some unknown reason I wanted a drink,

So I started in feeling my way to the sink,

I got along fine 'till I stepped on the cat;

I don't recall just what occurred after that—

When I came to, the house was flooded with light;

Although under the table I was high as a kite.

While visions of sugar plums danced in my head

I somehow got up, and then back to bed.

Then, what to my wondering mind should appear

That a miniature sleigh and eight tiny reindeer,

Then the sleigh seemed to change into a red fire truck,

And each reindeer turned into a beaky-eyed buck.

I knew in a moment it must be Old Nick—

I tried to call out, but my tongue was too thick.

The old devil whistled and shouted with glee,

While each buck pawed the earth and looked daggers at me,

Then he called them by name, and the names made me shudder,

When I heard them I felt like a ship minus a rudder.

"Now Egg-nog, Bacardi, Four Roses and Candy,

Now Fruit Cake, Cold Turkey, Gin Rickey and Brandy,

To the top of his house, to the top of his skull,

Now what away, crack away, with thumps that are dull."

Then in a twinkling I felt on my roof

The prancing and pawing of each cloven hoof,

How long this went on I'm sure I can't say—

'Tis it seemed an eternity,—plus a long day,

But finally the night after Christmas had passed

And I found I could really think straight at last,

But I thought of the New Year, a few days away,

And I've made me a vow no tempter can sway.

I'm sticking to water—I don't even want ice,

For there's nothing as tasty or nothing as nice.

The night after New Year's may bother some guys,

But I've learned my lesson, and Brother, I'm wise.

You can have your rich victuals, and liquor that's red,

But what goes to my stomach won't go to my head.

So, a big HAPPY NEW YEAR to you, and to all—

I'm back on the wagon, and (sh-a-s-h) hope I don't fall.

(Thanks to Saskatoon's "Station Agent")

THE FACTS IN PALESTINE

(From the Montreal Star)

Mr. Churchill has declared that no part of the British Labor government's policy "has been more marked by misjudgment and mismanagement than Palestine." One need not wholly agree with Mr. Churchill's statement. He speaks as Leader of the Opposition taking legitimate advantage of every opportunity to score off his opponents. But, agreeing with him or not, it is permissible to ask whether the time has not come for a change of policy in regard to Palestine. Events impose it, and Britain's own purposes in the Middle East may be better served if some accommodation is reached with Israel. Certainly these purposes will not be served by maintaining what Mr. Churchill calls a "sulky boycott" of a state which has proved its viability.

British policy in the Middle East is dictated by strategic needs. She needs military bases there, and oil. She needs allies, too, and has found them in some of the Arab states, notably in Trans-Jordan, which was a British creation, carved out of the larger Palestine committed to Great Britain's care by the League of Nations mandate. Trans-Jordan was separated from the rest of Palestine over the protests of the League and since its separation has gradually been built into a strong state, the strongest of the Arab states, stronger even than Egypt which, despite its larger population and greater resources, seems unable to muster its potential strength. Trans-Jordan owes this strength to British aid. If this state ceased to be Britain's ally, if it were denied the financial aid provided for by treaty, Abdullah's kingdom would fall apart like a house of cards and go back to the desert out of which it was carved.

This is a weak reed on which to rely in the Middle East. It is a particularly weak reed so long as there stands alongside it an Israel that, despite the ring of Arab states attacking it, has proved itself stronger than any one or any combination capable of acting. If Israel were going to disappear, Britain might reasonably persist in her present policies. But if one thing is more certain than another in the Middle East picture it is that Israel, either because of its own efforts or by reason of the support it has gained from other countries, is not going to disappear. Would it not, then, be the course of wisdom to come to some accommodation with this state? If it stands across strategic territory, could it not be brought into alliance with Britain and share with her the task of keeping the peace?

The alternative to Mr. Churchill's "sulky boycott" which is unrealistic and, given the friends Israel has been able to gather about her and her own determination to survive, unprofitable.

Mr. Churchill now thinks that it would have been easy to enforce Palestine under the German mandate. He is, he admits, Lord Javell for an opinion as to which side was the stronger in Palestine, Jew or Arab? Javell unhesitatingly said that if both sides were left to themselves the Jews would win. His judgment has been vindicated by the events, and Israel is even stronger now than it was when Javell made his assessment.

These are the facts of the Palestine situation. During the recent session of the United Nations, Britain made some compromises on the Palestine issue in response to pressure from the United States and other nations. Perhaps the time has come to make more, to persuade her ally, Trans-Jordan, that nothing more is to be gained by opposition to the existence of Israel, and by so doing bring peace to the Middle East.

Manure and Mixed Fertilizer Trials

The value of farm manures in the maintenance of soil fertility has long been recognized. Among their beneficial effects are the return to the soil of such plant nutrients as nitrogen, phosphorus and potassium, and the supply of organic residues and bacteria which increase the humus in the soil and improve the physical condition.

The composition of barnyard manure in regard to the major fertility elements will vary according to methods of storage, but may be taken as approximately 50 per cent nitrogen, 25 per cent phosphoric acid, and 50 per cent potash. A ton of manure in terms of nutrients is equivalent to 100 pounds of a 10-5-10 fertilizer. The availability of the nitrogen in manure is somewhat slow, and the residual effects of manure on crops appearing later in the rotation are prone to be more pronounced than those from commercial fertilizer.

Manure and commercial fertilizer have been compared in a rotation of mangels, oats, clover, and timothy on a loam soil, over a long period of years by the Field Husbandry Division. Central Experimental Farm, Ottawa, says A. J. MacLean. On the basis of 36 year averages, manure applied at 15 tons per acre for the mangel crop, increased the yields over those obtained on untreated plots by 15.39 tons, 20.0 bushels, 1.81 tons and 1.25 tons per acre of mangels, oats, clover, and timothy, respectively. The corresponding increases from application of 100 lb. of nitrate of soda, 300 lb. of superphosphate and 75 lb. of muriate of potash for the mangel crop, and 100 lb. of nitrate of soda for each of the other crops were 15.26 tons, 17.9 bushels, 1.34 tons and 76 tons per acre of mangels, oats, clover, and timothy, respectively. Although less effective than manure, commercial fertilizers alone have maintained relatively good yields.

As a supplement to manure, superphosphate is to be recommended on many soils. Where

manure is not available, or in limited supply, commercial fertilizers are valuable substitutes.

Fall Work on Land

Of the land intended for next year's crop 68 per cent is estimated to have been worked at October 31, as compared with 50 per cent at the same date last year, reports the Dominion Bureau of Statistics. By provinces the percentages are as follows, with the 1947 figures in brackets: Prince Edward Island 46 (62); Nova Scotia 56 (49); New Brunswick 57 (59); Quebec 56 (61); Ontario 69 (58); Manitoba 82 (86); Saskatchewan 65 (28); Alberta 72 (59) and British Columbia 45 (44).

New "Electro Brain" May One Day Play Chess

An electrical "brain" with close on 400,000 "thoughts" has been built by scientists at an English nerve hospital. Known as the "homestead," the invention consists of four simple magnets connected with a number of electrical circuits. When the brain is in its normal balance, the magnets cling together. When anything upsets its balance of magnets, the machine can use combinations of electrical circuits to restore its balance. This means it can choose any of 390,025 methods to defeat whatever is trying to destroy its balance.

Dr. William Ross Ashley, inventor of the homestead, claims that if the principle of operation were used in a "brain" many times larger it could be taught to play chess. This new machine took 15 years to design in principle and two more to build.

U.S. Apple Crop

United States final figures show the 1948 apple crop to be 90.3 million bushels, 6 million less than was estimated by the Department of Agriculture on October 1, 1948. The reduction is attributed to smaller sized apples. This year's commercial apple production is low compared with 113 million bushels in 1947, 114 million in 1946 or with the 1934-1946 average of 115 million bushels.

:: RAILWAY LABORATORY ::

By ZOE BIELER (Montreal Standard)

Chipping and smashing cups and saucers is one of the special jobs that occupies the technicians at the Canadian National Railway research laboratories in Montreal.

Most Canadian housewives will scoff at the idea that it needs technical training and special machines to break china. Junior can do it more than adequately with no training at all. But the piles of broken crockery on the laboratory floor may mean substantial dollar savings to Canada.

By systematically chipping the china with a hammer-like pendulum strung on a pulley, technicians can determine the force of impact needed to chip and smash several different brands of crockery. At the end of the experiment they will be able to decide which brand will be most durable for service in the CNR dining cars.

The laboratory is housed in a three-story building in the Point St. Charles district of Montreal. It was opened two years ago and is the only railway laboratory on the North American continent. It

marks another first for Canadian railway pioneering.

The main purpose of the laboratory is to save the railway money by making sure that goods and materials used by the system meet specifications and are the best to be had for the price. This gives the laboratory an amazingly wide scope, since the variety of goods used by the CNR in its railway ships and planes is almost unlimited. Everything from railway ties to flatware and upholstery come in to get a scientific going-over.

The laboratory is also used by the CNR to investigate claims. Not long ago the lab technicians had the case of the broken fish bowls tossed in their laps. The fish bowls had cracked during transit on a CNR freight train and the irate shipper sued. Tests in the laboratory showed that the bowls had not been carefully packed by the shipper and also that the glass was inferior.

There are two main divisions in the laboratory—chemical and metallurgical.

The chemical section analyzes fuels, paints, anti-freeze solutions, fire extinguishers, coal and all the other thousands of chemical materials that the railway uses. Since the laboratory opened, among the more important work has been the drawing up of specifications for materials that are constantly bought by the CNR. Recently the laboratory drew up new specifications for fire extinguisher fluid. The best type of fluid can also be used for fire cleaning, so the laboratory cannily added a dollop of red paint to the specifications to prevent people from using CNR fire extinguishers to remove spots from their clothing.

What happens to paints at the hands of the CNR chemists is just plain murder. The system uses

liquids of paint every year for both railway and ships, inside and outside, as well as for its many buildings. Samples of all these paints are sent to the laboratory for testing. Some are subjected to a tricky machine called the weather-ometer, which subjects them to concentrated ultra-violet rays and tests how they will stand up to sunlight. Others go into a salt spray box, which eventually eats the color out of them. Some are immersed in water and others are subjected to alternating heat and cold. Paints also go through a complete chemical analysis and are stripped right down to their basic pigments to make sure that they meet every specification.

By the time the laboratory is through, the CNR can be fairly sure just how a paint will act under every kind of weather condition.

Similar tests have been devised for fuel oils, coal, gasoline, steel, fabrics and scores of other products used by the system.

The metallurgy section of the laboratory is more concerned with the physical qualities of materials. It houses giant machines whose job it is to torture all sorts of materials and determine their strength and worth. One machine measures the exact width of anything from a sheet of flimsy paper to a huge block of iron. Another pulls samples of steel to the cracking point, while a third shatters slabs of cement and a fourth photographs the granular structure of metal samples. To the laboratory come such things as rail ties, samples of concrete, brass fittings, rock ballast for railway tracks, machine tools, and sand.

Work is never routine in the CNR laboratories. Sometimes it has quite an element of excitement and mystery. Such was the case when a huge drum of some strange

cough syrup. The syrup had been shipped by CNR freight and during transit the label had come off—so instead of going to its rightful destination, it ended up unclaimed in the freight yard. After the laboratory had discovered its identity it was a comparatively easy job to restore the syrup to its owner.—The Montreal Standard.

Antiquities of Britain

(By Elizabeth Richmond)

LOUGHBOROUGH

Loughborough, in north Leicestershire, England, is Britain's town of bells. About 100 years ago a man named John Taylor went there from Oxford to recast the bells of the parish church. He liked the quiet little town in the English Midlands and decided to stay there. He opened the foundry, which since then has been making bells, noted for their sweetness of tone, which have been exported to all parts of the world.

Any traveller is welcome to go through this famous foundry. Here was made England's biggest bell, known as Great Paul, now in St.

Paul's Cathedral, London. It weighs about 17 tons and is nine feet high.

As one might expect in the town of bells, Loughborough has its own carillon, which rings out from a tower in the park. There are 138 steps up the tower to the belfry. The bells there weigh altogether 21 tons and their silvery chiming are heard frequently. The town, indeed, has an official carillonneur, who gives notable performances, especially on great national occasions. At the head of each recital program appears a line from a poem by Thomas Campbell, who was born in 1777 and buried in Westminster Abbey. It runs "Bells toll for the brave, the brave who are no more."

SAXON CARVINGS

From the carillon tower there is a magnificent view of the neighbouring countryside. Below there is the town with two steeples, the drill hall, the Town hall and the well-planned streets. Beyond is the valley of the River Soar, where once was a Roman settlement. Derby lies 17 miles away to the north, and in the distance is Breedon-on-the-Hill, whose church contains remarkable Saxon carvings. In the other direction is the industrial city of Leicester, and nearer is Quorn, famous in the fox-hunting world.

Some of the bells John Taylor recast are still rung in the old bell tower of Loughborough's Church of All Saints.

Loughborough is the second largest town in Leicestershire. Besides the foundry, it has hosiery and electrical works. One of its citizens was John Chapman, born in 1801. In 1854, finding that his business was ruined, he went to London, became known for his work on the improvement of the hansom-cab, the horse-drawn "taxi-cab" of Victorian days. He was a pioneer of the Great Indian Peninsular Railway.

This 2-hp. Fairbanks-Morse "Z" Engine operates under load for about five hours on only one gallon of gasoline. Its Fairbanks-Morse high-tension Magneto insures easy starting. Only one place to oil—just fill the completely enclosed crankcase.

You Can Love 'Em and Leave 'Em

YOU'LL "love" the low fuel and oil consumption of a Fairbanks-Morse "Z" Engine. But best of all you'll like the way you can leave a "Z" Engine working unattended for hours.

For 30 years these farm engines have been famed for giving dependable, economical service. Today's improved models are even better than the earlier ones. Their low speed means slow wear. Their simple, single-cylinder design makes them easy and inexpensive to service—without calling a repair man. Sizes range to 30 hp., so there's a "Z" Engine for every farm job... for pumping and for driving milking machines and coolers, saws, hoists, elevators, and other farm equipment.

Easy to get inside

Just remove two bolts to lift off the crankcase cover of the 2-hp. "Z" Engine.

Easy to service

Crankshaft, bearings, connecting rod, piston, and gears are all easily accessible for inspecting and servicing.

2-hp. "Z" Engine with crankcase cover removed.

Import Control To Guard Against Newcastle Disease

To keep Canada free from Newcastle Disease, a virus ailment often fatal to poultry, the Dominion Department of Agriculture has restricted imports of hatching eggs and live poultry.

A Ministerial Order Number

64A issued December 8th under authority of the Animal Contagious Diseases Act prohibits entry to Canada of live chickens, turkeys, pigeons, geese, ducks or other barnyard fowl or other birds raised under domestic conditions unless their import is accompanied by proper veterinary certificates. These, certifying that the birds are free from and have not been exposed to Newcastle Disease, must be signed by a veterinarian

of the national government of the country of origin. Live poultry from the United States must be accompanied by a certificate, signed or endorsed by a veterinarian of the U.S. Bureau of Animal Industry.

Similar certificates are required for the import of hatching eggs from all kinds of poultry. Official veterinarians in the exporting countries are required to certify that the eggs originate from a flock or flocks free from Newcastle Disease. The eggs are required to be imported in new, clean cases, trays or fillers.

Known to scientists as avian pneumoencephalitis, Newcastle Disease is highly contagious. It usually shows up first as a respiratory infection and may be followed by paralysis, killing more chicks than mature birds but always sending old birds off lay. Few outbreaks of Newcastle Disease have been identified in Canada and these are believed to have been stamped out, says Dr. T. Childs, Veterinary Director General.

Liberal Convention

J. W. Stambaugh, President of the Alberta Liberal Association, announced in Edmonton that the National Liberal Federation is holding a meeting in Ottawa on January 25th and 26th. Plans are being made to send delegates to this meeting.

On February 2nd and 3rd a provincial Convention is being held at Calgary. The association is anxious to have a fairly full representation at this provincial meeting and at the same time send several delegates to the Ottawa convention.

On February 11th a convention will be held in the Jasper-Edson constituency for the purpose of

Letters to the Editor

Ottawa, Ontario,
January 6th, 1949.

The Editor:

Dear Sir — In reviewing reports from our postmasters in all parts of Canada, on the handling of the Christmas mails this year, I have been deeply impressed by the co-operation extended to the Post Office by the public in mailing early.

The Christmas mail volume was unprecedented in most offices, exceeding greatly even last year's record totals. Despite this, the fact that the great bulk of this huge quantity of mail was posted before December 20th assured orderly and expeditious handling by the augmented staffs we had at work. This happy situation made it possible for us to have most offices clear of Christmas mail by Christmas Eve, with the exception of some foreign mails which arrived late in the day.

It is true that the department itself carried on a very intensive mail early campaign throughout Canada in the month before Christmas, but I do feel that some of the credit must go to the newspapers of the country, who through brightly written news stories, special articles and editorials, brought to the public a greater understanding of our problem than might otherwise have been the

result of nominating a candidate for the Federal election and also for the purpose of electing new officers for the constituency.

It is expected that J. Harper Prowse, M.L.A., Provincial Liberal Leader, will attend both the Calgary and Jasper-Edson meetings.

House Plants Need A Rest in Winter

According to horticultural officials of the Dominion Department of Agriculture, winter should be a season of rest for house plants. It should be a period of relaxation and an opportunity to store up energy for later activity.

The resting period is naturally induced by the shortened days and lowered temperatures. With many plants this slowing process may be imperceptible, with others it is distinct and unmistakable. Bulbous plants are an instance of complete rest. Many house plants will cease to bloom and others will do so feebly. Most of those which will flower at this season have been conditioned or prepared for blooming during the preceding months of summer or autumn.

Recognition of the above facts indicates the winter treatment. All practices which tend to stimulate growth should be held in check. Less water is needed, potting and root disturbance of any kind should be suspended. Fairly low temperatures are desirable, but may be difficult to obtain.

The temperature of the home must of necessity be maintained at a point favouring the comfort of the human rather than the plant inmates. It is a conservative statement that places a winter dwelling house temperature at 70 degrees. This is much too high for a great many plants. It is a good growing temperature for warmth-loving plants under conditions of spring daylight and ample humidity. But the combined effects of high temperature, comparative darkness and a dry atmosphere are not favourable to general plant health.

Perhaps the reasonable attitude to take in this respect is to maintain a day temperature around 70 degrees with a drop to about 60 degrees after retiring. To promote humidity, the usual evaporating pans on radiators and metal trays of gravel on window sills will help.

case. I would be remiss indeed if I did not make suitable acknowledgment of this assistance, and I know that I speak for everyone in the Postal Service in saying, "thank you," and expressing our best wishes for the success of your publication throughout 1949.

Yours sincerely,

W. J. TURNBULL,

Deputy Postmaster General.

High Egg Output And Good Plumage

Good egg production and good plumage are two conditions that do not always go together; indeed, loss of feathers is often regarded as a natural consequence of the stress of heavy laying.

The two most common causes of feather loss are moulting and feather picking, although the reasons for each condition are quite different. Moulting is often the aftermath of some condition such as ill health or disturbance. Feather picking is a vice that presents many perplexities when the basic causes are sought. Overcrowding, inactivity, and lack of bulk in the feed have frequently been blamed for outbreaks of feather pulling, but even where these conditions do not exist the trouble still occurs.

At the Dominion Experimental Station at Harrow, Ont., says W. F. Mountain, the maintenance of good plumage during the time of heavy production has been studied for some years. It has been found that, in the first stages, feather picking does not seem to have serious effects, but the border line to injury and cannibalism is very narrow. In a pen where picking was allowed to run its course, ten per cent of the birds were lost within three days. Later, more birds succumbed to injuries inflicted by others.

Once under way, the vice is not always easy to check, so preventative, rather than curative methods, were chosen for trial. Succulent green feeds gave early promise of providing freedom from feather picking, and later tests have shown either chopped alfalfa hay or sprouted oats to be fairly consistent in allaying the urge of poultry to pick at one another. From a practical standpoint the hay treatment is favoured, particularly if power equipment is available to chop the hay. Cut in

half-inch lengths, steeped in cold water overnight, drained in the morning and fed in shallow tubs, the alfalfa is very palatable judging by the appetite of the birds for it. Less waste occurs if second cutting hay is used.

Freedom from feather picking is reflected in the appearance of the birds and while appearance alone does not denote maximum profit, it does indicate that harmony, an essential factor for good egg production, exists in the flock. In this sense, the feeding of succulent greens has much to recommend it.

WHAT IS A PROFITEER?

By H. J. THOMPSON

The disappointing reports of the House of Commons' Price Committee is now history. They found no profiteers. Our contention is that they worked from the wrong end. What good housekeeper would leave her house in a dirty mess when warned to expect visitors.

Any city in the west, small town or rural area, can testify to specific instances of excessive charges or even gross profiteering. Certainly it is an acknowledged and admitted fact that no new car can be bought without stooping to black market prices. The same thing applies to tractors and many lines of machinery.

My definition of profiteering is simple. Any person, merchant, agent or company, who takes advantage by adding excessive price to goods in short supply on a buyers competitive market is a gross profiteer.

If products of factories cannot be speeded up to meet demands along lines of short supply to meet consumer needs, then laws, provincial or federal, should be immediately enacted to cancel licenses of any person convicted of unethical business transactions.

The buying public can be blamed for this situation by not exposing their personal experience to their representatives in the provincial and dominion parliaments detailed and explicit instances of unfair charges, instead of gloating over their less fortunate neighbour who cannot get the car, tractor or even the three spools of barbed wire he has had on order for the last three years, because he doesn't know the ropes, or will not be a party to such sordid and dirty methods. Public opinion can remedy this situation, your government is your servant; the machinery is there to be used. A dead battery is no use to a car. An aroused public opinion forcing definite proof in detailed form for the attention of the proper authorities will change a stream of electric action that will get much different results than that of the Ottawa Price Committee.

Chemical Analyses Protect Buyers

To implement the acts of the Dominion Department of Agriculture respecting feeding stuffs, fertilizers and pesticides, large numbers of samples are analysed each year to determine whether the manufacturer's guarantee is met.

The number of chemical analyses of these products during the present year will approximate 11,000 of which about 7,000 will be of feeding stuffs for protein, fat and fibre, and the remainder will be fertilizer and pesticide products. The official chemical analysts are specialists in their field and in most cases are chemists in Dominion Government laboratories and in the chemical departments of Canadian universities and colleges. They are gazetted as official analysts of the staff of Plant Pro-

ducts Division, Dominion Department of Agriculture. Dependable analyses are essential for protecting farmers of Canada under these acts.

Rebekah Lodge Installs Officers

MILLET — At the regular meeting of the Sunbeam Rebekah Lodge No. 112 on Jan. 4 the district deputy president, Mrs. Dorothy Trathem with deputy marshal, Mrs. Lucille Blades, installed the following officers:

Mrs. Clara Kerr, JPNG; Mrs.

Wilda Kerr as noble grand; Mrs. Leila Kerr, vice-grand; Mrs. May Barth, recording secretary; Mrs. Annie Womack, financial secretary; Mrs. Madge Plante, treasurer; Mrs. Vera Gardiner, warden; Mrs. Ann Kroening, conductor; Mrs. Ruby Baber, outside guardian; Mrs. Alice Wagner, inside guardian; Mrs. Annie Pogue, RSNG; Mrs. Pearl Scott, LSNG; Mrs. B. Grover, LSVG; Mrs. Eva Clarke, RSVG; Mrs. Margaret Thompson, chaplain; Mrs. Jean Scott, musician.

Millet News Items

MILLET — Mr. Arnold Wagar passed away suddenly last Sunday, Jan. 9. He made his home with his son Harold Wagar, who farms east of Millet. Mr. Wagar was 71 years of age and until his sudden death had been enjoying fairly good health. Funeral services were held in the Campbell's Funeral Chapel at Wetaskiwin, Wednesday afternoon. Interment was made in the Millet cemetery.

Mr. Robert Young, accompanied by his wife and small son went to Edmonton on Friday to see his uncle, Mr. James Young, who was one of the Scottish curlers touring Canada. He had never seen his uncle before and was looking forward with considerable pleasure to the meeting.

Mr. Henry G. Young spent the past week in Calgary where he was attending the convention of the UFA and AFU.

Reports have been received of some cases of mumps in the district.

Mr. Stanley Fenton and his family, late of the Peace River district, have bought the farm formerly owned by R. Krause and will now make their home in the Telford district.

Mrs. Harry Phillips reports having seen a gopher today. A bit early for a gopher. Apparently the warm springlike weather has made at least one gopher think spring is here.

The Millet Hockey team entertained a team from Wetaskiwin on Sunday afternoon, Jan. 9. Unfortunately the score was in favor

of the visitors 3-0. But the game was worth watching.

On Thursday evening a team from Leduc visited Millet. Leduc made two counters in the first period. Millet tied the score in the second session. Neither team scored in the third, but Leduc took the game in overtime, scoring one more marker.

Mrs. Cecil Ward of Kerriemuir, Alta., visited last week at the home of Mr. and Mrs. James Fleming.

Miss Ethel Gilmar of Fawcett, Alta., is spending a week at the home of Mr. and Mrs. T. H. Howes.

New branches of the Alberta Women's Institute reported by Mrs. T. H. Howes, district director, are Tindastoll W.I., west of Innisfail, and Good Will W.I., of James River in the Olds constituency.

The Hillside Farm Forum met at the home of Mr. and Mrs. T. H. Howes on Monday evening, Jan. 10. The next meeting will be at the home of Mr. and Mrs. J. O. Harvey.

ROLLY VIEW NEWS

ROLLY VIEW — Miss Esther Scholer of Luseland, Sask., is visiting with her sister, Mrs. M. Glocker of Rolly View.

Born to Rev. and Mrs. M. Glocker, on January 12, a son.

The annual meeting of the members of St. Paul's Lutheran congregation, Rolly View, was held on Wednesday afternoon, Jan. 12, in the church.

Miss Emma Schmidt is visiting at her home at Rolly View for a few days.

Art Grams spent the week-end at Rolly View.

Miss Erna Hoffman of Looma is still employed at R. Grams.

Foreman: "You are asking big pay for a man with no experience."

Applicant: "Well, the work is much harder when you don't know anything about it."

Two women were chatting over tea.

"Yes," said one, reminiscently, "I fell desperately in love with my dear husband at first sight. I remember it just as though it were yesterday. I was walking along the front at Brighton with my father, and he suddenly pointed to him and said, 'There, my dear, goes a wealthy man!'"

HAY LAKES NEWS

HAY LAKES — A Calgary air enthusiast was in Hay Lakes with his plane last week. He hoped to sell it to one of the local fliers who are taking lessons.

Mr. and Mrs. Frank Greenwood are living in the house formerly occupied by Mr. and Mrs. V. Fox.

A new Chevrolet truck has been purchased by E. Kreamer.

Mr. and Mrs. M. Movola motored to Edmonton last week.

Dinner guests at E. Kreamer's on Thursday evening, Jan. 13, included Mr. and Mrs. C. Nordin, Mrs. Kiel, Mr. and Mrs. Sich, Mr. and Mrs. Ralph Heald, Mr. and Mrs. Reg. Berry, Mr. and Mrs. W. Tullis and Mr. and Mrs. A. Rachue.

Mr. and Mrs. Somers and children were visiting Mr. and Mrs. Dan Schweitzer last week.

M. Sich has enlarged his shop to include groceries as well as meats. The shop is now open for business.

Everyone, especially those who participated, enjoyed the Search for Talent broadcast over CPBN on Monday, Jan. 10 from 7 to 8 p.m.

Alfild Naalund was home for a short week-end visit.

A Legion rink of curlers skipped by C. Nordin went to Camrose on Sunday to compete in a Legion

contest. Other members of the team were M. Sich, W. Tullis and O. Grahm.

Announcing
the
